DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-21, drawn to magnetic particles which comprises a magnetic material and a matrix material which has a surface comprising functional groups which promote disaggregation of the particles in the presence of a liquid phase.

Group II, claim(s) 22-36, drawn to a process of making the magnetic particles.

Group III, claim(s) 37-55, drawn to a method of using the magnetic particles.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the same or corresponding special technical features are the magnetic particles of group. However, such magnetic particles are taught by Wang 5,395,688.

Wang teaches magnetic particles comprising a ferromagnetic material and a polymer coating (matrix) and on the surface of the polymer coating is functional group such as carboxyl. (see col. 3, lines 5-10, lines 28-40, col. 4, lines 26-28). The specification defines functional groups are acids such as carboxyl, sulpho, aryloxy (see pg. 11). Thus, if Wang teaches the same functional group on the matrix, then such functional group would be able to promote disaggregation of the particles in the presence of a liquid phase.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
